

Dear valued B2B and Dental Sleep Solutions patient,

In an effort to support state and national efforts to fight the COVID-19 pandemic, our practice is taking the following steps to help assure your health and well-being along with our team, their families and our community.

*We are following the recommendations put out by the American Dental Association and the Tennessee Dental Association to close our office and limit patients seen to only those who have an urgent dental need.

*Your health and the health of our dedicated team, matters to us, so going forward we will suspend all non-emergency care for the next two weeks.

*Patients will be seen only for urgent and emergency dental needs during limited hours on Tuesdays mornings and Thursday afternoons.

*We will have phone coverage during normal business hours from 8am-5pm Monday through Thursday.

The safety and well-being of our patients continues to be our primary concern. We will continue to monitor the status of COVID-19 nationally and within our community and keep you up-to-date regarding our plans to reopen for business as usual. If you have any questions regarding this issues please either email or call us; 931-645-8000. For now, please keep an eye out for social media posts, vidoes and ways to continue to maintain your oral health and keep in touch with our team and office!

God bless,

Dr. Cornell
